Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Formal Matters

Claims 119-123 are pending and under consideration.

Information Disclosure Statement

The Information Disclosure Statement filed 8/4/2004 has been considered, and an initialed copy is attached.

Response to Amendment

The objection to the Specification because the title is not descriptive, and because of the use of a hyperlink, has been obviated by Applicant's amendment and is thus withdrawn.

The rejection of claims 119-123 under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,001,963 (Bergsma et al.), has been obviated by Applicant's showing of Priority back to the provisional Application 60/141,037 filed 06/23/1999.

New issues are set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 119-123 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,001,963 (Bergsma et al.). The '963 patent has a priority date of 9/26/1997.

Art Unit: 1646

The '963 patent discloses the cloning and expression of HFGAN72 receptor ligands. The '963 patent further discloses monoclonal, polyclonal and humanized antibodies, as well as fragments of antibodies (column 134, lines 25-42) to these proteins. The '963 patent also discloses labeled antibodies which bind the HFGAN72 polypeptide (column 13, lines 5-10). The claims are anticipated because the HFGAN72 polypeptide sequence shares a sequence of 11 amino acids which are 100% identical (see Sequence Comparison A, attached), thus an antibody to this region would bind to the polypeptide of SEQ ID NO: 119, and the claims are anticipated.

Conclusion

No claim is allowed.
